- The sales campaign for the Edifício Seda II, in Matosinhos, Portugal, was launched ;
- Studies for licensing of Edifício D. João V, Lisboa and Country Club da Maia, have started.

## 6. Adopting the IAS

The Company decided to adopt International Accounting Standards (IAS) in its consolidated accounts for 2001. Pro-forma accounts for 2000 and, when necessary, 1999 were prepared so as to allow comparisons.

The first reason for this was the increasing internationalisation of the Company, both in terms of the markets where it is investing and its sources of funding. The Company is therefore led to report its performance and investment on a basis that is comparable to the one used by the other operators in these international markets.

On the other hand, the IAS is increasingly recognised as the standard of the future – actually the European Union ruled that from 2005, all listed European Companies should report on that basis.

Furthermore it is the Company's conviction that accounts prepared under IAS reflect in a particularly appropriate way the activities of a Company undertaking property investment.

The Company Results from now on will include two basic components. The first as up to now, correspond to the Result realised on investments held, both current and arising on any disposal. The second component corresponds to the change in value of the investment portfolio, as determined by independent valuation .
